

Chinese American Schools

Experts in Chinese / American Education

Chinese American Schools, LLC., is a limited liability company registered in the State of Nevada, U.S.A. We have assembled a team of highly qualified experts in the field of Chinese-American education. Our combination of knowledge, experience, and investment capital provides the powerful and effective catalyst necessary to bring an exceptional private school into operation. We fully support our unique dual Chinese and English language and cultural immersion model through:

➤ **Experienced educational leadership in Chinese/American schools**

Our program is based on the experience and input of administrators from the top Chinese/American schools in the world, representing the United States, China, and Taiwan.

➤ **Curriculum development specifically for Chinese/American schools**

Dual immersion Chinese and English schools require a very specialized curriculum, especially where students have not had that type of experience in the lower grades. Our curriculum is developed to be accessible to non-native speakers of Chinese and English, yet strong enough to uphold the academic and content area demands of a college-preparatory program.

➤ **Academic excellence recognized by Chinese and American accrediting agencies**

Our academic program is designed to fulfill and exceed the requirements to be fully recognized and accredited. We are experienced in and familiar with formal approval and review processes as well as the means to obtain special awards, recognition, and grants for academic excellence.

➤ **Establishment of a school culture supportive of Chinese & American values**

Chinese culture and values can be used to great advantage if they are recognized and utilized. They can also lead to specific areas of weakness or character problems if not properly addressed. Our experience in school culture allows us to capitalize on the strengths of both cultures and meet the needs of all our students as they develop academically, emotionally, socially, physically, and spiritually.

Chinese American Schools

➤ **Chinese & English instructional programs designed for non-native speakers**

Educational research confirms that the learning process for non-native language acquisition differs from native language acquisition. A non-English speaker cannot simply learn English by using texts designed for the American market. We've known for years through experience that you cannot learn Mandarin by using texts written for Chinese students. Our curriculum is designed with the understanding that we are working with non-native speakers and readers, and those learning differences are accounted for in order to provide a stronger, more effective academic program.

➤ **Academic & cultural enrichment through teacher and student exchange programs**

Nothing replaces opportunities for first-hand experience. With our unique relationship to numerous Chinese American schools, we can insure that students will learn from and develop comfort with the language, customs, values, and thinking of both Chinese and American cultures through personal interaction with teachers, students, and opportunities to travel.

➤ **Integration and implementation of technology into the learning environment**

We are committed to using technology not only to enhance the classroom environment, but as an opportunity to bring the world to the classroom. Students will become proficient in using technology as a regular part of their learning and skills development.

➤ **Student Services to support the specific needs of Chinese/American students**

A full range of student services, extra-curricular activities, sports, and clubs will be offered to provide a well-rounded and comprehensive life experience in school every day.

*Chinese American Schools knows that **quality education** comes from **quality schools** and is the result of **quality leadership and planning**. We have designed and developed a world-class academic program that is tailored to students who want to thrive in a Chinese/American environment.*

*Our vision is to develop Chinese American schools that will produce **students of excellence in academics and character**, fully prepared to enter the top universities in China and the United States. These young men and women will become tomorrow's **global leaders and the standard bearers** for a bright future in China, the United States, and Chinese-American relations.*
